

I run deafbase.com membership website with more than 4,600 deaf, hard of hearing and hearing members.

I wish to comment how much they talk about, comment on using VRS that's impacting the way they communicate with each other and especially with all these cheap video phones that are being available to the consumers.

They have been saying, "GA" which stands for "Go Ahead" on TTY/TDD machines ever since until the recent boom of the VRS market.

I strongly recommend reimbursing the VRS marketly appropriately to ensure the quality of the VRS (Video Relay Service) communications.

Sincerly,
